

Hotel ÆQUORA Lanzarote Suites controls the purity of the air and the need of ventilation in real time.

The **Smart indoor Air Quality Monitor** has been specially designed to indicate the ventilation needs and to guarantee the salubrity of the air in closed spaces.

FEATURES

Temperature, Humidity, CO2 and Particles Suspension (PM 2.5) Sensors.

LED indicator for ventilation needs in real time:

-  No need to ventilate
-  Ventilation is recommended
-  Need to ventilate

Indicator of the possibility of a virus contagion

Virus indicator

Statistical indicator based on the probability of contagion according to temperature, relative humidity, CO2 concentration and small particles that facilitate the formation of bioaerosols

-  **10-7 GOOD: Low probability of contagion**
-  **7-3 MEDIUM: Moderate Probability of contagion**
-  **3-0 BAD: HIGH probability of contagion**
